

# Study biological complexity with single-cell multiomics

Understanding gene regulation and single-cell heterogeneity often requires information about both protein expression and RNA including the profiling of full-length (antigen-specific) B cell and T cell receptors. There are few technologies that allow concurrent examination of both types of molecules in a single experiment with a single readout.

We kindly invite you to this informative seminar about scRNAseq and multiomics. Participation is free of charge. Please register by clicking the registration link or using the provided QR-code.

**Date:** April 24, 2023, 15:00 h – 17:00 h

**Location:** to be determined

## Program:

- 15:00 – 16:00 h     **Introducing single-cell multiomics with the BD Rhapsody™ analysis system**  
*Ray van Haaren, Senior Single-Cell Solution Architect, BD Biosciences*
- 16:00 – 16:15 h     **Evaluating Antigen Specificity and its Impact on Immunity using Dextramer® Technology**  
*Mohammad Salem, PhD  
Pharma Business Development Manager, Immudex ApS*
- 16:15 – 16:45 h     **Single-cell transcriptomics on cells with low mRNA content**  
*Dr. Stefan Salcher, Clinic for Hematology and Oncology, Medical University Innsbruck, Austria*
- From 16:45 h     **Q&A**  
*Meet the experts with drinks & snacks*

## Contact:

**Dr. Jan Philipp Mallm**  
*Lab Head Single-cell Open Lab, DKFZ*  
**E-Mail:** [j.mallm@dkfz-heidelberg.de](mailto:j.mallm@dkfz-heidelberg.de)

For any questions, please contact

**Dr. Anna-Maria Miederer**  
*Product Specialist, BD Biosciences*  
**E-mail:** [Anna-Maria.Miederer@bd.com](mailto:Anna-Maria.Miederer@bd.com)
